

Automate AP to cut costs,
take control of your cash, and
make more informed decisions.

Transcepta gives you total control over your cash and lets you **pay suppliers when it makes sense for you.**

Invoices are processed and sent directly to your system with no manual effort and are ready to pay in minutes. Plus you get real-time visibility into your transactions and up-to-date supplier information all in a single platform.

Eliminate invoice exceptions and costly manual processes

With Transcepta, invoices are automatically matched to purchase orders and sent directly to your system with no manual effort. Invoices without a PO are coded and forwarded to the correct person for approval. Transcepta also gives suppliers visibility into the entire invoice cycle so you can say goodbye to endless invoice status requests.

Control your cash

When AP is automated, you control your cash and pay suppliers early for a discount, or schedule payments when they're due. No more scrambling just to pay invoices on time. It's your choice, pay suppliers when you want.

Get visibility and make informed decisions

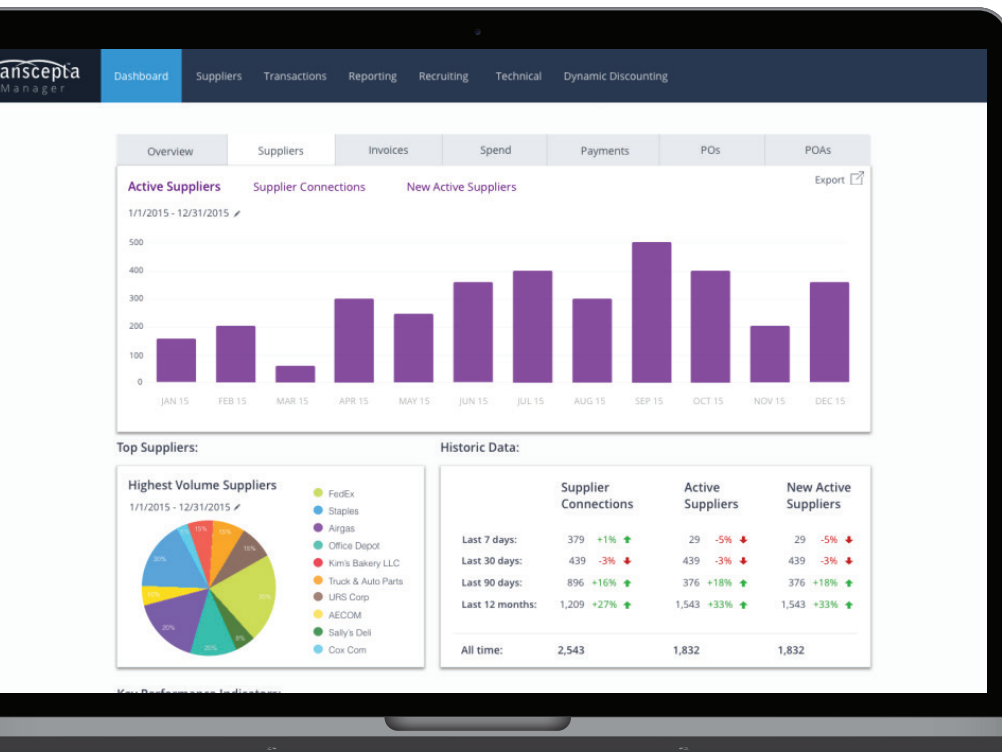

Get a birds-eye view of supplier activity, invoice data, and purchase orders to identify trends or potential problems. Dashboards and reports are easily shared with the appropriate people in your company. Suppliers easily update their profile with W-9s, banking details, and contact information so you always have access to up to date information.

“

*Without Accounts Payable automation from Transcepta our supplier invoices would be arriving at an empty office. The pandemic highlighted the acute need for automation and we're so thankful that we invested early. **We're saving so much time and keeping our suppliers happy in the process. It's a win-win.***

Charlotte Arnold
VP Operational Accounting

Accounts Payable *simplified*

- Pay suppliers timely, accurately, and when it makes sense for you.
- Invoices are processed and scheduled for payment in minutes.
- Suppliers can send invoices however they want for free, and they get paid on time.
- Supplier information is centralized, up to date, and at your fingertips.
