

Get the Information You Need, When You Need it With Transcepta Supplier Information Management

Key Capabilities

- Enable suppliers to easily provide W9 tax forms, insurance certificates, and other important documentation
- Send automated reminders to suppliers that have not uploaded required documents
- Alert suppliers when their documents are about to expire
- Give suppliers visibility into current and past transactions and their status

All of your supplier information in one intuitive, user-friendly dashboard

Managing a supply chain with inaccurate and fragmented information can be both time-consuming and frustrating. Transcepta Supplier Information Management (SIM) simplifies day-to-day supplier management by creating a complete view of your supplier data. Suppliers are able to easily upload important data to the Transcepta Supplier Portal so you can access current contact information, W9s, transaction history, and banking details.

Create a complete view of supplier information

Consolidate all supplier information into an easy-to-use, searchable database. Information is updated in real-time so you can rest assured that you will always have the correct data.

Make participation easy for suppliers

Transcepta SIM provides suppliers with an intuitive self-service dashboard to manage all required information, including W9s, contact information, address, POs, and invoice data.

Automatically send supplier alerts

Put an end to the phone calls and emails for missing supplier information. Transcepta SIM automatically alerts suppliers that they are out of compliance and must upload additional documentation.

All the information you need to manage supplier relationships in one intuitive user interface.

Centralize supplier communication

Ease the burden on suppliers by centralizing all of your information requests. Reduce the number of duplicate and misdirected communications to avoid supplier frustration and lack of participation.

Increase visibility

Transcepta SIM provides you with a dashboard that shows all relevant supplier information. You can also receive reports in the format you need if you would like to import data into your ERP system.

Supplier information management *simplified*

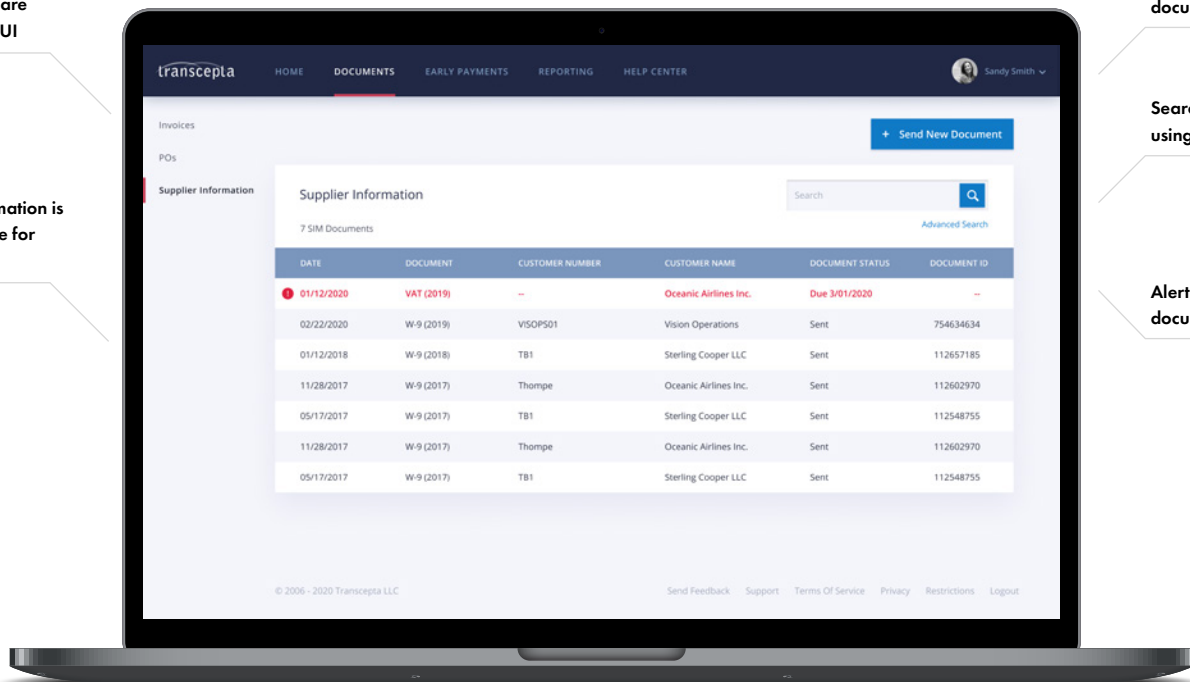

POs and invoices are stored in a single UI

All supplier information is organized by date for easy recall

Easily send important documents to suppliers

Search for documents using keywords

Alert suppliers when documents are out of date

There's a better way to manage supplier relationships
